About

OSEF Programs

Oakland County Competitive Robotics Association - OCCRA is a full-contact robotics competition, where students in high school design, build and control 120 pound robo-gladiators that compete against each other.

Oakland County Outstanding Teacher of the Year - The Oakland County Outstanding Teacher of the Year Awards program was established in 1987 to recognize and reward Oakland County's public school teachers who have achieved the highest standards of excellence in their profession.

Oakland County Support Person of the Year - This award, established in 1990, recognizes the contributions made by those in support positions throughout the local schools districts in Oakland County.

Oakland Schools Scripps Regional Spelling Bee - OSEF took over the Oakland County Regional Spelling Bee in 2018 and is proud to continue a long lived tradition in our county. Students in grades 5-8 who win their school spelling bees are invited to participate. The winner receives an all-expense paid trip to compete in the Scripps National Spelling Bee held in Washington, D.C.

Scholarships for Success - OSEF awards scholarships to students attending Oakland Schools Technical Campuses to further their education in college, trade school or apprenticeship programs.

Fiscal Agent for School Research Finance Collaborative - In 2018, the School Finance Research Collaborative produced Michigan's first comprehensive school adequacy study. The study determined the true cost of educating a child and provided the roadmap to fixing Michigan's broken school funding approach.

NEW! Classroom Libraries - In order to provide local school districts in Oakland County struggling with providing their students access to books, OSEF is raising funds to create classroom libraries in our elementary schools, along with providing professional learning for the teachers on methods to support interactions with these new books.

NEW! Young Inventor's Challenge - In March 2020, OSEF will be launching a Young Inventor's Challenge, encouraging students in grades 1-12 to develop a toy or game or an invention that solves a problem that they have encountered. This initiative will foster creative thinking, innovation, problem solving and collaboration - all 21st century skills needed in today's job market.
